## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-15 of copending Application No. 10/136,897. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: the claimed subject matter is essentially the same with minor grammatical differences.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other

Art Unit: 3713

copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 has two positive recitations of "a voucher" in lines 1 and line 5. It is unclear which recitation of "a voucher" is being referred to in the following claims. Appropriate correction is required. The examiner recommends changing the second recitation in line 5 to the voucher.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saunders et al WO 98/59311 in view of Stern US Patent 6,110,044. Saunders discloses all of the instant application with the exception of specifically disclosing the use a validation character string and an optical character recognition process. Instead Saunders

discloses on page 8 that many forms of the ticket may be used as long as the ticket has the coded value information. In an analogous invention to Stern there is disclosed a printer which prints a bar code and a validation number and is capable of reading both of the numbers. Column 1 discloses that the data printed on the ticket may be generated on a printed circuit board controlling play of the gaming machine or by an auxiliary printed circuit board. Column 5 discloses the use of OCR. One would be motivated to combine the reference in order to process a multitude of data on a ticket as suggested on page 16 of Saunders that "the information contained in the bar code may also contain other information such as the identity of the player, a PIN number, and a unique ticket number. It is obvious to one of ordinary skill in the art that the teachings of the above references anticipate the claimed subject matter since it is obvious to make what is integral separate and what is separate integral and further since both teachings are disclosed.

***Citation of Pertinent Prior Art***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following pieces of prior art are all related to voucher printers with coded indicia:

Hafezi '850, Burns '269, Rowe '907, Brooks et al '655, Storch et al '148, Fillod et al '215, Saunders et al '832, Saunders '326, Burns '781, Luciano et al '067
